tribunal of Toledo alone, under the superinten-
dence of two inquisitors, disposed of three thousand
three hundred and twenty-seven processes in little
more than a year. The number of convicts was
greatly swelled by the blunders of the Dominican
monks, who acted as qualifiers, or interpreters
of what constituted heresy, and whose ignorance
led them frequently to condemn as heterodox,
propositions actually derived from the fathers of
the church. The prisoners for life, alone, became
so numerous, that it was necessary to assign them
their own houses as the places of their incarcera-
tion.

The data for an accurate calculation of the num-
ber of victims sacrificed by the Inquisition during
this reign are not very satisfactory. From such as
exist, however, Llorente has been led to the most
frightful results. He computes, that, during the
eighteen years of Torquemada's ministry, there
were no less than 10,220 burnt, 6,860 condemned,
and burnt in effigy as absent or dead, and 97,321
reconciled by various other penances; affording an
average of more than 6,000 convicted persons an-
nually. In this enormous sum of human misery

l'Inquisition, tom. i. p. 239.)—In
Seville, with probably no greater
apparatus, in 1482, 21,000 pro-
cesses were disposed of. These
were the first fruits of the Jewish
heresy, when Torquemada, al-
though an inquisitor, had not the
supreme control of the tribunal.
54 Llorente afterwards reduces
this estimate to 8,800 burnt, 96,504
otherwise punished; the diocese of
Cuenca being comprehended in that
of Murcia. (Tom. iv. p. 259.) Zu-
rita says, that, by 1530, the Inquisi-
tion of Seville had sentenced more
than 4,000 persons to be burnt, and
30,000 to other punishments. An-
other author whom he quotes, car-

is not included the multitude of orphans, who, from
the confiscation of their paternal inheritance, were
turned over to indigence and vice. Many of
the reconciled were afterwards sentenced as relaps-
ed; and the Curate of Los Palacios expresses the
charitable wish, that "the whole accursed race of
Jews, male and female, of twenty years of age and
upwards, might be purified with fire and fagot!"

The vast apparatus of the Inquisition involved
so heavy an expenditure, that a very small sum,
comparatively, found its way into the exchequer, to
counterbalance the great detriment resulting to the
state from the sacrifice of the most active and skil-
ful part of its population. All temporal interests,
however, were held light in comparison with the
purification of the land from heresy; and such aug-
mentations as the revenue did receive, we are
assured, were conscientiously devoted to pious pur-
poses, and the Moorish war!

By an article of the primitive
instructions, the inquisitors were
required to set apart a small por-
tion of the confiscated estates for
the education and Christian nur-
ture of minors, children of the
condemned. Llorente says, that,
in the immense number of proces-
ses, which he had occasion to con-
sult, he met with no instance of
their attention to the fate of
these unfortunate orphans! Hist.

similar sentence passed by Lope
de Barrientos, another Dominici-
can, about fifty years before, upon
the books of the marquis of Vil-
lena. Fortunately for the dawning
literature of Spain, Isabella
did not, as was done by her suc-
cessors, commit the censorship of
the press to the judges of the Holy
Office, notwithstanding such occa-
sional assumption of power by the
grand inquisitor.

The Roman see, during all this time, conducting itself with its usual duplicity, contrived to make a gainful traffic by the sale of dispensations from the penalties incurred by such as fell under the ban of the Inquisition, provided they were rich enough to pay for them, and afterwards revoking them, at the instance of the Castilian court. Meanwhile, the odium, excited by the unsparing rigor of Torquemada, raised up so many accusations against him, that he was thrice compelled to send an agent to Rome to defend his cause before the pontiff; until, at length, Alexander the Sixth, in 1494, moved by these reiterated complaints, appointed four coadjutors, out of a pretended regard to the infirmities of his age, to share with him the burdens of his office. 58

This personage, who is entitled to so high a rank among those who have been the authors of unmixed evil to their species, was permitted to reach a very old age, and to die quietly in his bed. Yet he lived in such constant apprehension of assassination, that he is said to have kept a reputed unicorn’s horn always on his table, which was imagined to have the power of detecting and neutralizing poisons; while, for the more complete protection of his person, he was allowed an escort of fifty horse

Garibay (Compendio, lib. 18, cap. 17,) puts these at three, Pulgar (Reyes Católicos, part. 2, cap. 77,) at four, L. and two hundred foot in his progresses through the kingdom.\(^59\)

This man's zeal was of such an extravagant character, that it may almost shelter itself under the name of insanity. His history may be thought to prove, that, of all human infirmities, or rather vices, there is none productive of more extensive mischief to society than fanaticism. The opposite principle of atheism, which refuses to recognise the most important sanctions to virtue, does not necessarily imply any destitution of just moral perceptions, that is, of a power of discriminating between right and wrong, in its disciples. But fanaticism is so far subversive of the most established principles of morality, that, under the dangerous maxim, "For the advancement of the faith, all means are lawful," which Tasso has rightly, though perhaps undesignedly derived from the spirits of hell,\(^60\) it

Llorente's History of the Inquisition.

Don Juan Antonio Llorente is the only writer who has succeeded in completely lifting the veil from the dread mysteries of the Inquisition. It is obvious how very few could be competent to this task, since the proceedings of the Holy Office were shrouded in such impenetrable secrecy, that even the prisoners who were arraigned before it, as has been already stated, were kept in ignorance of their own processes. Even such of its functionaries, as have at different times pretended to give its transactions to the world, have confined themselves to an historical outline, with meagre notices of such parts of its internal discipline as might be safely disclosed to the public.

Llorente was secretary to the tribunal of Madrid from 1790 to 1792. His official station consequently afforded him every facility for an acquaintance with the
not only excuses, but enjoins the commission of the most revolting crimes, as a sacred duty. The more repugnant, indeed, such crimes may be to natural feeling, or public sentiment, the greater their merit, from the sacrifice which the commission of them involves. Many a bloody page of history attests the fact, that fanaticism, armed with power, is the sorest evil which can befall a nation.

most recondite affairs of the Inquisition; and, on its suppression at the close of 1808, he devoted several years to a careful investigation of the registers of the tribunals, both of the capital and the provinces, as well as of such other original documents contained within their archives, as had not hitherto been opened to the light of day. In the progress of his work he has anatomized the most odious features of the institution with unsparing severity; and his reflections are warmed with a generous and enlightened spirit, certainly not to have been expected in an ex-inquisitor. The arrangement of his immense mass of materials is indeed somewhat faulty, and the work might be recast in a more popular form, especially by means of a copious retrenchment. With all its subordinate defects, however, it is entitled to the credit of being the most, indeed the only, authentic history of the Modern Inquisition; exhibiting its minutest forms of practice, and the insidious policy, by which they were directed, from the origin of the institution down to its temporary abolition. It well deserves to be studied, as the record of the most humiliating triumph, which fanaticism has ever been able to obtain over human reason, and that too, during the most civilized periods, and in the most civilized portion of the world.

The persecutions, endured by the unfortunate author of the work, prove, that the embers of this fanaticism may be rekindled too easily, even in the present century.
CHAPTER VIII.

REVIEW OF THE POLITICAL AND INTELLECTUAL CONDITION OF THE SPANISH ARABS PREVIOUS TO THE WAR OF GRANADA.

We have now arrived at the commencement of the famous war of Granada, which terminated in the subversion of the Arabian empire in Spain, after it had subsisted for nearly eight centuries, and with the consequent restoration to the Castilian crown of the fairest portion of its ancient domain. In order to a better understanding of the character of the Spanish Arabs, or Moors, who exercised an important influence on that of their Christian neighbours, the present chapter will be devoted to a consideration of their previous history in the Peninsula, where they probably reached a higher degree of civilization than in any other part of the world.

It is not necessary to dwell upon the causes of the brilliant successes of Mahometanism at its out-

set,—the dexterity with which, unlike all other religions, it was raised upon, not against the principles and prejudices of preceding sects; the military spirit and discipline, which it established among all classes, so that the multisarious nations who embraced it, assumed the appearance of one vast, well-ordered camp; the union of ecclesiastical with civil authority intrusted to the caliphs, which enabled them to control opinions, as absolutely as the Roman pontiffs in their most despotick hour; or lastly, the peculiar adaptation of the doctrines of Mahomet to the character of the wild tribes among whom they were preached. It is

2 The Koran, in addition to the repeated assurances of Paradise to the martyr who falls in battle, contains the regulations of a precise military code. Military service in some shape or other is exacted from all. The terms to be prescribed to the enemy and the vanquished, the division of the spoil, the seasons of lawful truce, the conditions on which the comparatively small number of exempes are permitted to remain at home, are accurately defined. (Sale's Koran, chap. 2, 8, 9, et alibi.) When the algebed, or Mahometan crusade, which, in its general design and immunities, bore a close resemblance to the Christian, was preached in the mosque, every true believer was bound to repair to the standard of his chief. "The holy war," says one of the early Saracen generals, "is the ladder of Paradise. The Apostle of God styled himself the son of the sword. He loved to repose in the shadow of banners and on the field of battle."

3 The successors, caliphs or vicars, as they were styled, of Mahomet, represented both his spiritual and temporal authority. Their office involved almost equality ecclesiastical and military functions. It was their duty to lead the army in battle, and on the pilgrimage to Mecca. They were to preach a sermon, and offer up public prayers in the mosques every Friday. Many of their prerogatives resemble those assumed anciently by the popes. They conferred investitures on the Moslem princes by the symbol of a ring, a sword, or a standard. They complimented them with the titles of "defender of the faith," "column of religion," and the like. The proudest potentate held the bridle of their mules, and paid his homage by touching their threshold with his forehead. The authority of the caliphs was in this manner founded on opinion no less than on power; and their ordinances, however frivolous or iniquitous in themselves, being enforced, as it were, by a divine sanction, became laws which it was sacrilege to disobey. See D'Herbelot, Bibliothèque Orientale, (La Haye, 1777-9,) voce Khalifah.

4 The character of the Arabs,
sufficient to say, that these latter, within a century after the coming of their apostle, having succeeded in establishing their religion over vast regions in Asia, and on the northern shores of Africa, arrived before the Straits of Gibraltar, which, though a temporary, were destined to prove an ineffectual bulwark for Christendom.

The causes which have been currently assigned for the invasion and conquest of Spain, even by the most credible modern historians, have scarcely any foundation in contemporary records. The true causes are to be found in the rich spoils offered by the Gothic monarchy, and in the thirst of enterprise in the Saracens, which their long uninterrupted career of victory seems to have sharpened, rather than satisfied. The fatal battle, which before the introduction of Islam, like that of most rude nations, is to be gathered from their national songs and romances. The poems suspended at Mecca, familiar to us in the elegant version of Sir William Jones, and still more, the recent translation of "Antar," a composition indeed of the age of Al Raschid, but wholly devoted to the primitive Bedouins, present us with a lively picture of their peculiar habits, which, notwithstanding the influence of a temporary civilization, may be thought to bear great resemblance to those of their descendants at the present day.

5 Startling as it may be, there is scarcely a vestige of any of the particulars, circumstantially narrated by the national historians (Mariana, Zurita, Abarca, Moret, &c.) as the immediate causes of the subversion of Spain, to be found in the chronicles of the period. No intimation of the per-
terminated with the slaughter of King Roderic and the flower of his nobility, was fought in the summer of 711, on a plain washed by the Guadalete near Xerez, about two leagues distant from Cadiz. The Goths appear never to have afterwards rallied under one head, but their broken detachments made many a gallant stand in such strong positions as were afforded throughout the kingdom; so that nearly three years elapsed before the final achievement of the conquest. The policy of the conquerors, after making the requisite allowance for the evils necessarily attending such an invasion, not the pen of a Bede or an Eginhart to describe the memorable catastrophe. But the few and meagre touches of the contemporary chroniclers have left ample scope for conjectural history, which has been most industriously improved.

The reports, according to Conde, (Dominacion de los Arabes, tom. i. p. 36,) greedily circulated among the Saracens, of the magnificence and general prosperity of the Gothic monarchy, may sufficiently account for its invasion by an enemy flushed with uninterrupted conquests, and whose fanatical ambition was well illustrated by one of their own generals, who, on reaching the western extremity of Africa, plunged his horse into the Atlantic, and sighed for other shores on which to plant the banners of Islam. See Cardone, Histoire de l' Afrique et de l'Espagne sous la Domination des Arabes, (Paris, 1765,) tom. i. p. 37.

6 The laborious diligence of Masdeu may be thought to have settled the epoch, about which so much learned dust has been raised. The fourteenth volume of his "Historia Crítica de España y de la Cultura Española" (Madrid, 1783—1805,) contains an accurate table, by which the minutest dates of the Mahometan lunar year are adjusted by those of the Christian era. The fall of Roderic on the field of battle is attested by both the domestic chroniclers of that period, as well as by the Saracens. (Incerti Auctoris Additio ad Joan- nem Bifarensem, apud Florez, España Sagrada, tom. vi. p. 430. — Isidori Facensis Episcopi Chronicon, apud Florez, España Sagrada, tom. viii. p. 290.) The tales of the ivory and marble chariot, of the gallant steed Orelia and magnificent vestments of Roderic, discovered after the fight on the banks of the Guadalete, of his probable escape and subsequent seclusion among the mountains of Portugal, which have been thought worthy of Spanish history, have found a much more appropriate place in their romantic national ballads, as well as in the more elaborate productions of Scott and Southey.

7 "Whatever curses," says an eyewitness, whose meagre diction is quickened on this occasion into something like sublimity, "whatever curses were denounced by the prophets of old against Jerusalem, whatever fell upon ancient
may be considered liberal. Such of the Christians, as chose, were permitted to remain in the conquered territory in undisturbed possession of their property. They were allowed to worship in their own way; to be governed, within prescribed limits, by their own laws; to fill certain civil offices, and serve in the army; their women were invited to intermarry with the conquerors; and, in short, they were condemned to no other legal badge of servitude than the payment of somewhat heavier imposts than those exacted from their Mahometan brethren. It is true the Christians were occasionally exposed to suffering from the caprices of despotism, and, it may be added, of popular fanaticism. But, on the whole, their condition may sustain an advantageous comparison with that of any Christian people under the Mussulman dominion of later times, and affords a striking contrast with that of our Saxon ancestors after the Norman conquest, which suggests an obvious parallel in many of its circumstances to the Saracen. Babylon, whatever miseries Rome inflicted upon the glorious company of the martyrs, all these were visited upon the once happy and prosperous, but now desolated Spain.” Pacensis Chronicen apud Florez, España Sagrada, tom. viii. p. 292.

8 The frequency of this alliance may be inferred from an extraordinary, though, doubtless, extravagant statement cited by Zuniga. The ambassadors of James II., of Aragon, in 1311, represented to the sovereign pontiff, Clement V., that, of the 200,000 souls, which then composed the population of Granada, there were not more than 500 of pure Moorish descent. Anales, tom. iv. fol. 314.

9 The famous persecutions of Cordova under the reigns of Abderrahman II. and his son, which, to judge from the tone of Castilian writers, might vie with those of Nero and Diocletian, are admitted by Morales (Obras, tom. x. p. 74,) to have occasioned the destruction of only forty individuals. Most of these unhappy fanatics solicited the crown of martyrdom by an open violation of the Mahometan laws and usages. The details are given by Florez, in the tenth volume of his collection.
